SUN LIFE GLOBAL INVESTMENTS (CANADA) INC.

ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE

for the financial year ended December 31, 2016

Sun Life MFS Global Growth Fund

This annual management report of fund performance contains financial highlights but does not contain the complete financial statements of the investment fund. You can request a free copy of the annual financial statements by calling 1-877-344-1434, by sending an email to us at info@sunlifeglobalinvestments.com or by writing to us at Sun Life Global Investments (Canada) Inc., 150 King Street West, Toronto, Ontario, M5H IJ9. Our financial statements are available on our website at www.sunlifeglobalinvestments.com and on SEDAR at www.sedar.com. All of the financial information is calculated based on the pricing Net Asset Valuation for the investment fund, unless otherwise stated.

Unitholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record or quarterly portfolio disclosure.

MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Investment Objective and Strategies

The fundamental investment objective of Sun Life MFS Global Growth Fund (the "Fund") is to seek capital appreciation by investing primarily in equity securities of issuers located anywhere in the world that are considered to have above-average earnings growth potential compared to other issuers.

The Fund's sub-advisor is MFS Institutional Advisors, Inc. ("MFS"). MFS uses a bottom-up investment approach to select investments primarily based on fundamental analysis of issuers and their potential in light of their current financial condition and industry position, as well as market, economic, political and regulatory conditions. Other factors considered are earnings, cash flows, competitive position and management ability of the issuers. The Fund may invest in securities of issuers located anywhere in the world, including those in emerging markets.

Risk

There were no changes in the Fund's investment objective or strategy during the period which materially impacted the overall level of risk in the Fund. The risks associated with investing in the Fund remain as outlined in the Fund's Simplified Prospectus.

Results of Operations

During the period, the net asset value of the Fund increased from \$63.2 million to \$74.3 million. The increase in net asset value was due to positive net sales, partially offset by negative performance during the period.

During the period, the Fund returned -0.2% for Series A units. This result lagged the Fund's benchmark, the MSCI AC World C\$, which returned 4.1%. The performance returns for other series of this Fund are similar to those of Series A except for differences in expense structures. Please refer to the 'Past Performance' section of this report for performance of each series.

Security selection in both the Consumer Staples and Materials sectors detracted from relative performance. Within the Consumer Staples sector, the Fund's overweight position in beauty products manufacturer Coty (United States), and infant and children's pediatric nutrition producer Mead Johnson Nutrition (United States), weakened relative returns. There were no individual securities within the Materials sector that were among the Fund's top relative detractors.

The Fund's underweight position in the Energy sector was another area of relative weakness. There were no individual securities within this sector that were among the Fund's top relative detractors. In other sectors, the Fund's overweight positions in hospitality company Whitbread (United Kingdom), athletic shoes and apparel manufacturer NIKE (United States), pharmaceutical and medical products maker Abbott Laboratories and diagnostics and pharmaceutical company Roche Holding Ltd (Switzerland), hampered relative performance. The Fund's position in computer graphics company NVIDIA Corp (United States), health care company UnitedHealth Group (United States), insurance and investment firm Berkshire Hathaway (United States), and an underweight position in mobile phones and personal computer maker Apple (United States), also detracted from relative returns.

Stock selection in the Healthcare sector was a positive factor for performance relative to the MSCI All Country World Growth Index. The Fund's overweight position in medical device company Cooper Companies (United States) and not holding a position in pharmaceutical company Novo Nordisk (Denmark), contributed to relative results.

Security selection and to a lesser extent an overweight position in the Information Technology sector also benefited relative performance. The Fund's overweight positions in semiconductor design and manufacturing company Texas Instruments (United States), semiconductor manufacturer Taiwan Semiconductor (Taiwan), management consulting firm Accenture (United States), and financial services and technology and outsourcing services provider Fidelity National Information Services (United States), bolstered relative results.

Security selection and to a lesser extent an underweight position in the Financials sector was another area of relative strength. The Fund's overweight position in financial services company Credicorp (Peru), benefitted relative performance.

Elsewhere, the Fund's overweight positions in the world's largest luxury goods company LVMH (France), and foods producer M Dias Branco (Brazil) contributed to relative performance. Shares of industrial company Colfax Corporation (United States) also aided relative results.

Recent Developments

Sluggish global growth weighed on both developed and Emerging Market ("EM") economies during much of the period, though signs of improved growth became evident in late 2016. The U.S. Federal Reserve increased interest rates by 25 basis points at the end of the period, the second hike of the cycle which began in December 2015. Globally, however, central bank policy remained highly accommodative, which forced many government, and even some corporate bond yields into negative territory during the period. During the first half of the period, the United Kingdom voted to leave the European Union, beginning a multi-year process of negotiation in order to achieve "Brexit." While markets initially reacted to the vote with alarm, the spillover to European and EM economies were relatively short-lived, although risks of further hits to European Union cohesiveness could re-emerge. Late in the period, the surprising U.S. presidential election outcome prompted a significant rally in equities and a rise in bond yields in anticipation of an inflationary policy mix from the incoming Trump administration.

Headwinds from lower energy and commodity prices, which had spread beyond the Energy, Materials and Industrial sectors early in the period, decreased later in the period as stabilizing oil prices helped push energy earnings higher relative to expectations. A sharp rise in the U.S. Dollar was a headwind for multinationals late in the period. The sharp rise in the U.S. Dollar also weighed on earnings. U.S. consumer spending held up well during the second half of the period amid a modest increase in real wages and relatively low gasoline prices. Demand for automobiles reached near-record territory, while the housing market continued its recovery. Slow global trade continued to mirror slow global growth, particularly for many EM countries. That said, EM countries began to show signs of a modest upturn in activity along with adjustment in their external accounts. These improved conditions appeared to have reassured investors and contributed to record inflows into the asset class during July and August as negative yields for an increasing share of developed market bonds drove yield-seeking investors further out on the risk spectrum.

Similar investor inflows were experienced in the investment grade and high yield corporate markets. Late in the period, however, new challenges emerged for emerging markets debt as a result of the U.S. presidential election, which raised concerns about the potential for a protectionist turn in U.S. trade policy which could negatively impact EM economies.

These concerns, along with rising expectations for U.S. growth, inflation and rates, have turned the tables on flows into emerging market debt. Since the election, flows have reversed. As of the end of the period, the markets seemed to be in a wait-and-see mode, looking for evidence to either confirm or refute the repricing of risk that has occurred since Election Day.

Effective February 5, 2016, all Series E and EF units were redesignated to Series A units, under the Front End Sales Charge option, and Series F units, respectively, of the same Fund. Please refer to the Fund's simplified prospectus for more details about the captioned change and for details about the Private Client Program.

Related Party Transactions

Sun Life Global Investments (Canada) Inc. (the "Manager") is the manager, trustee and portfolio manager of the Fund.

The Manager is responsible for the provision of all general management and administrative services required by the Fund in its day-to-day operations, including providing or arranging for the provision of investment advice, bookkeeping, recordkeeping and other administrative services for the Fund.

As trustee, the Manager holds legal title to the Fund's investments in trust for unitholders. For its services, the Manager receives a management fee that is calculated as a percentage of the average net asset value of the Fund. This fee is calculated daily and payable monthly.

As portfolio manager, the Manager is responsible for managing the investment portfolio of the Fund directly or through sub-advisors. The Manager has retained MFS Institutional Advisors, Inc. ("MFS"), an affiliate, to act as a sub-advisor for the Fund.

The Manager is an indirect wholly owned subsidiary of Sun Life Financial Inc., which also has an indirect majority ownership interest in MFS.

Fund Administrative Expenses

The Manager pays certain of the operating expenses of each Fund (the "Administration Expenses") in return for a fixed administration fee paid to the Manager by each Fund ("Administration Fee"). The Administration Fee is based on the net asset value of each series of the Fund. The Administration Expenses include, but are not limited to, record keeper fees, accounting, audit and legal fees, bank and interest charges, safekeeping and custodial fees, taxes, administrative and systems costs, costs of reports to investors, prospectuses and other disclosure documents, regulatory filing fees (including those incurred by the Manager) and trustee fees for registered plans. The amount of this charge is disclosed as a fund administrative expense in the Fund's Statement of

Comprehensive Income found in the annual financial statements (audited).

Each Fund also pays certain operating expenses directly (the "Fund Costs"). Fund Costs include: borrowing costs incurred by the Fund from time to time; costs in connection with portfolio transactions; fees and expenses payable to or in connection with the Fund's Independent Review Committee ("IRC"); taxes payable by the Fund; and the costs of complying with any new regulatory or legal requirement imposed on the Fund. Each Fund allocates Fund Costs proportionately among its series of units. The Fund Costs that are specific to a series of units are allocated to that series. These amounts are paid out of the assets attributed to each series of units of the Fund, which reduces the return you may receive.

Series Description

The Fund offers the following series of units: A, T5, T8, D, F, I and O. The date of creation for Series A, F, and I units was October 1, 2010, the date of creation for Series D units was November 1, 2012, the date of creation for Series T5 and T8 units was September 1, 2011, and the date of creation for Series O units was April 1, 2014.

Series A, T5 and T8 units are available to all investors.

Series T5 and T8 units are designed to provide investors with a fixed monthly distribution based on a target annualized distribution rate of 5% and 8%, respectively, of the net asset value per unit of the relevant series at the end of the prior year.

Series D units are only available for purchase by existing investors who held Class D units of the Fund on March 30, 2012. Investors may switch their Series D units of one fund into Series D units of another Sun Life Global Investments Mutual Fund, but may not switch units of another series into Series D units. Once a Series D investor no longer owns any Series D units, the investor may not purchase additional Series D units. In addition, Series D units may be switched into any other series (if available), if the investor meets the applicable requirements for those series.

Series F units are available to investors who have a fee-based account with their dealer and whose dealer has signed an agreement with the Manager. Instead of paying sales charges, investors buying Series F units pay fees to their dealer for investment advice and other services. The Manager does not pay any commissions to dealers in respect of Series F units, so the Manager can charge a lower management fee.

Series I units are special purpose securities that are currently only available to other mutual funds and eligible institutional investors. Series I units are not sold to the general public. Each Series I investor negotiates its own management and advisory fee that is paid directly to the Manager.

Series O units are available to investors through the Private Client program and must be purchased through a Private Client account. Each Series O investor pays a management fee directly to the Manager and is eligible for management fee reductions, if any, based on the value of Series O units held in the investor's Private Client account. Series O management fees are paid, after subtracting any management fee reductions, by a redemption of Series O units in the investor's account.

FINANCIAL HIGHLIGHTS

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance from the date of inception to December 31, 2016.

- (1) This information is provided as at December 31 of the period shown, as applicable.
- Management expense ratio is based on total expenses (excluding broker commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average Net Asset Value during the period. Prior to 2015, the Manager of the Fund waived some of its management fees and/or absorbed some expenses that would normally be charged to the Fund.
- $\ensuremath{^{(3)}}$ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average Net Asset Value during the period.
- (4) The Fund's portfolio turnover ratio indicates how actively the Fund's portfolio manager manages its portfolio investments. A portfolio turnover ratio of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a Fund's portfolio turnover ratio in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high portfolio turnover rate and the performance of the Fund.
- (5) Percentages are annualized.
- Comparatives prior to 2013 are prepared in accordance with Canadian GAAP. Figures subsequent to 2013 are prepared in accordance with IFRS.

Management Fees

The annual maximum management fee paid by the Fund is a percentage of the average daily net asset value of each series exclusive of any applicable taxes and operating expenses, which is accrued daily and is paid to the Manager monthly in arrears. Management fees pay for portfolio and investment advisory services, oversight of any service providers, marketing and promotional activities, arranging for the distribution and sale of securities of the Fund, general administration of fund operations and sales and trailing commissions paid to dealers.

The percentages and major services paid for out of the management fees are set out below:

		As a Percentage of Management Fees		
	Maximum Annual Management Fee Rate (%)	Dealer Compensation (%) ¹	General Administration, Investment Advice and Profit (%)	
Series A Units	2.00	39	61	
Series T5 Units	2.00	26	74	
Series T8 Units	2.00	43	57	
Series D Units	1.25	9	91	
Series F Units	1.00	_	100	
Series I Units	_	_	_	
Series O Units ²	1.00	_	100	

Includes sales and trailing commissions.

PAST PERFORMANCE

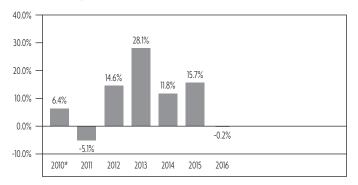

The indicated rates of return are the historical annualized and annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any unitholder that would have reduced returns. Mutual funds are not guaranteed. How a fund performed in the past does not necessarily indicate how it will perform in the future.

Year-by-Year Returns

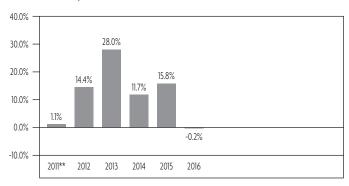

The following bar chart shows the Fund's annual performance for the period shown. The chart shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the last day of each period.

Series O management fees are not paid by the Fund. Series O investors pay management fees directly to the manager.

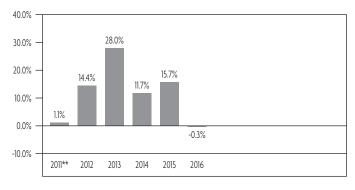

Series A Units – Annual return for the period ended December 31, 2016

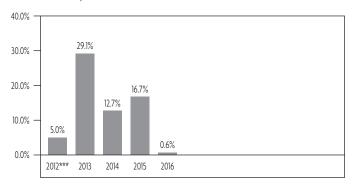

Series T5 Units – Annual return for the period ended December 31, 2016

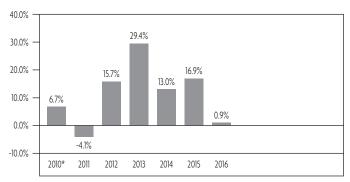

Series T8 Units – Annual return for the period ended December 31, 2016

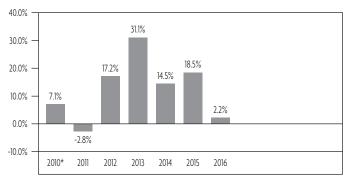

Series D Units – Annual return for the period ended December 31, 2016

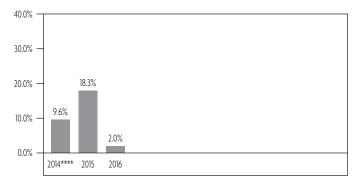

Series F Units – Annual return for the period ended December 31, 2016

Series I Units – Annual return for the period ended December 31, 2016

Series O Units – Annual return for the period ended December 31, 2016

- * for the period of October 1, 2010 to December 31 2010
- ** for the period of September 1, 2011 to December 31 2011
- *** for the period of November 1, 2012 to December 31 2012
- **** for the period April 1, 2014 to December 31, 2014

Annual Compound Returns

The following table compares the historical annual compound total returns of Series A, T5, T8, D, F, I and O units of the Fund with the MSCI AC World C\$ Index.

The MSCI AC World C\$ Index is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets.

The Series A units underperformed the benchmark since inception, over the past five years, over the past three years and over the past year.

Forward-Looking Statements

This management report of fund performance may contain forward-looking statements about the Fund, including its strategy, results of operations, performance and condition. Forward-looking statements include statements that are predictive in nature, or that depend upon or refer to future events or conditions. They are based on current beliefs, expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and various economic factors. Many factors could cause the Fund's actual results, performance or achievements to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements. These factors could include, among other things, general economic, political and market factors, including interest and foreign exchange rates, business competition, technological changes, changes in government regulations or in tax laws. Although the forward-looking statements contained in this report are based upon what management currently believes to be reasonable assumptions, the Manager cannot assure current or prospective investors that actual results, performance or achievements will be consistent with these forward-looking statements. The words "may", "could", "would", "should", "believe", "plan", anticipate", "expect", "intend", "forecast", "objective", and similar expressions are intended to identify forward-looking statements.

⁽²⁾ Cash and Cash Equivalents, for the purpose of this chart, includes other assets less liabilities
