

# 2022 Annual Distribution Estimates

## Mutual Fund Trust Units

Mutual funds must distribute sufficient income and capital gains each year so that no Canadian income tax will be payable by a fund. Distributions are determined by a variety of factors, including realized gains on securities sold during the year, the amount of dividend and interest income received by a fund, and the level of purchases and redemptions of units of a fund. Mutual funds must pass those earnings on to its unitholders or those gains will be subject to corporate income taxes and excise taxes. These taxes would, in effect, reduce your total return.

SLGI Asset Management Inc. has prepared these distribution estimates for the below funds using data as of October 7, 2022.

These year-end distributions are estimates only and the actual distributions will be based on income and capital gains earned by the Funds to their December 2022 taxation year-end. Please keep in mind that income earned in the Funds, changes in market activity, portfolio activity, or redemptions between the date of these estimates and the fund's year-end can cause significant changes in the amount of the actual distributions. Accordingly, actual distributions that will be paid based on income and capital gains earned by the funds could change significantly from these estimates. SLGI Asset Management Inc. shall not be held responsible if actual distributions vary from these estimates.

The year-end distributions for the SLGI Asset Management Inc.-sponsored mutual fund trusts are scheduled to occur during the period of December 15, 2022 to December 31, 2022.

Please read the prospectus before investing.** Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated. The payment of distributions is not guaranteed and may fluctuate. The payment of distributions should not be confused with a fund's performance, rate of return, or yield.
