Fund category

Canadian Equity
Balanced

Fund categories are maintained by the Canadian Investment Funds Standards Committee (CIFSC).

Investment objective

The fundamental investment objective is to seek to provide income with capital appreciation as a secondary objective, by investing primarily in income-producing securities.

This Fund may be suitable for investors who:

- are investing for the medium to long term
- are more interested in income than growth
- can handle changes in the value of their investment.

NOTES AND DISCLAIMERS

^Management Expense Ratio is an estimate in the first year.

Sun Life Assurance Company of Canada, a member of the Sun Life Financial group of companies, is the issuer of Sun Life GIFs individual variable annuity contracts. A description of the key features of this contract is contained in the information folder.

Subject to any applicable death benefit and maturity guarantees, any part of the premium or other amount that is allocated to a segregated fund is invested at the risk of the contract owner and may increase or decrease in value according to fluctuations in the market value of the assets of the segregated fund.

Please refer to sunlifegifs.com for additional information.

Morningstar is an independent organization that groups funds with generally similar investment objectives for comparison purposes and ranks them on a historical basis.

Morningstar star ratings are an objective, quantitative measure of a fund's historical risk-adjusted performance relative to other funds in its category, and are calculated from a fund's 3, 5, and 10-year returns measured against 91-day Treasury bill and peer group returns. The top 10% of the funds in a category earn five stars; the next 22.5% four stars; the following 35% three stars; the next 22.5% two stars, and the bottom 10% one star. The Overall Rating is a weighted combination of the 3, 5, and 10-year ratings. Only funds with at least a three-year track record are considered, and ratings are calculated only for categories with at least 20 funds.

Morningstar quartile rankings show how well a fund has performed compared to all other funds in its peer group. Each fund within a peer group is ranked based on its performance, and these rankings are broken into quarters or quartiles. Within a group, the top 25% (or quarter) of the funds are in the first quartile, the next 25% are in the second quartile, the next group in the third quartile, and the bottom 25% of funds with the poorest relative performance are in the fourth quartile. The point in which half the funds had better performance and half had worse performance is the median. If 100 funds are being compared, there would be four quartiles of twenty-five funds each. The median would be the fiftieth fund.

For more details on the calculation of Morningstar star ratings or quartile rankings, please see www.morningstar.ca.

The Morningstar Style Box™ reveals a fund's investment strategy. For equity funds the vertical axis shows the market capitalization of the stocks owned and the horizontal axis shows investment style (value, blend or growth). For fixed-income funds the vertical axis shows the average credit quality of the bonds owned, and the horizontal axis shows interest rate sensitivity as measured by a bond's duration (short, intermediate or long).

Morningstar category averages are equal-weighted category returns. The calculation is simply the average of the returns for all the funds in a given category. The standard category average calculation is based on constituents of the category at the end of the period.

Categories are assigned by Canadian Investment Funds Standards Committee (CIFSC) based on an evaluation of a fund's holdings. A fund's category may change at any time. Funds within the same category may differ in terms of investment philosophy, investment process, as well as overall composition.
