

## Sun Life MFS Global Total Return Fund

## Series A

### Key reasons to invest

- An actively managed global balanced fund seeking a blend of growth and income
- A typical mix of 60% equities and 40% fixed income, designed to remove market timing
- Takes a value-based approach, with a tilt to global large-cap stocks
- Global fixed income exposure is focused on investment grade corporate bonds

### Investment growth of \$10,000

Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus before investing. For periods greater than one year, the indicated rates of return are the historical annual compounded total returns as of the date indicated including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any security holder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.

Compound growth calculations are used only for the purpose of illustrating the effects of compound growth and are not intended to reflect the future value of any mutual fund or returns on investment in any mutual fund.

The payment of distributions is not guaranteed and may fluctuate. The payment of distributions should not be confused with a fund’s performance, rate of return, or yield. Annual distributions paid as a result of capital gains realized by a fund and income and dividends earned by a fund are taxable in your hands in the year they are paid.
