

Sun Life Granite Growth Class | Series A

Current value of a \$10,000 investment

Time frame:
Start Aug 2013
End Sep 2020
\$16,672

The calculator generates an approximate rate of return using performance information as at the first business day of each month in your chosen time frame. Returns for funds less than 1 year old cannot be displayed. The default settings invest \$10,000 on the inception date of the fund, with an end date of January in the current year. For informational purposes, the initial investment amount and time frame can be adjusted according to your preference.

NOTE: This Fund is a class of mutual fund shares of Sun Life Global Investments Corporate Class Inc.

Investment objective

The Fund's investment objective is to seek capital appreciation and income, with a bias towards capital appreciation, through exposure to primarily fixed income and equity securities by investing primarily in units of Sun Life Granite Growth Portfolio or its successor fund (the "Portfolio").

This Fund may be suitable for investors who:

- seek capital appreciation
- seek diversification through a broad range of asset classes, geographies, and investment styles
- are long-term investors
- are comfortable with low to medium investment risk

3-year risk measures | as of September 30, 2020

Annualized returns are used to calculate the risk metrics below.

Standard deviation (fund)	10.50	Sharpe ratio	0.38
Alpha	-3.38	Beta	1.08

Benchmark: 21.6% S&P/TSX Capped Composite Index, 58.4% MSCI World Index, 7.5% FTSE Canada Universe Bond Index, 2.5% FTSE Canada 91 Day T-Bill Index, 10.0% JPM GBI Global Hdg C\$ Index.

Standard deviation is a measure of volatility; it shows how broadly returns have varied over a given time period. Generally, a high standard deviation implies greater volatility.

Sharpe ratio combines a risk measurement and a return measurement into a single number to determine a fund's risk-adjusted return. A higher value is better.

Alpha measures the difference between a fund's return and its benchmark, taking into account volatility (beta). An alpha of 1 means a fund outperformed its benchmark by 1%; -1 means the fund underperformed by 1%.

Beta measures the movement of a fund in relation to its benchmark. A beta over 1 means price moves are greater (up or down) than the benchmark's; below 1 means less extreme price moves; 1 means it moves in step with its benchmark.

Notes and disclaimers

The Sun Life Granite Growth Class invests directly in units of the Sun Life Granite Growth Portfolio (the "underlying Trust Fund"). The portfolio analysis section is representative of the underlying Trust Fund.

Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus before investing. For periods greater than one year, the indicated rates of return are the historical annual compounded total returns as of the date indicated including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any security holder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.

Compound growth calculations are used only for the purpose of illustrating the effects of compound growth and are not intended to reflect the future value of any mutual fund or returns on investment in any mutual fund.

The Morningstar Style Box™ reveals a fund's investment strategy. For equity funds the vertical axis shows the market capitalization of the stocks owned and the horizontal axis shows investment style (value, blend or growth). For fixed-income funds the vertical axis shows the average credit quality of the bonds owned, and the horizontal axis shows interest rate sensitivity as measured by a bond's duration (short, intermediate or long).

Average credit quality gives a snapshot of the fund's overall credit quality. It is an average of each fixed income security's credit rating, adjusted for its relative weighting in the fixed income portion of the fund. Morningstar, Inc. is not itself a Designated Rating Organization (DRO), nor does it issue a credit rating on the fund. A DRO's ratings can change from time-to-time.
